

BEST PRACTICE

Health Care for
Community
Development

OBJECTIVES OF THE PRACTICE

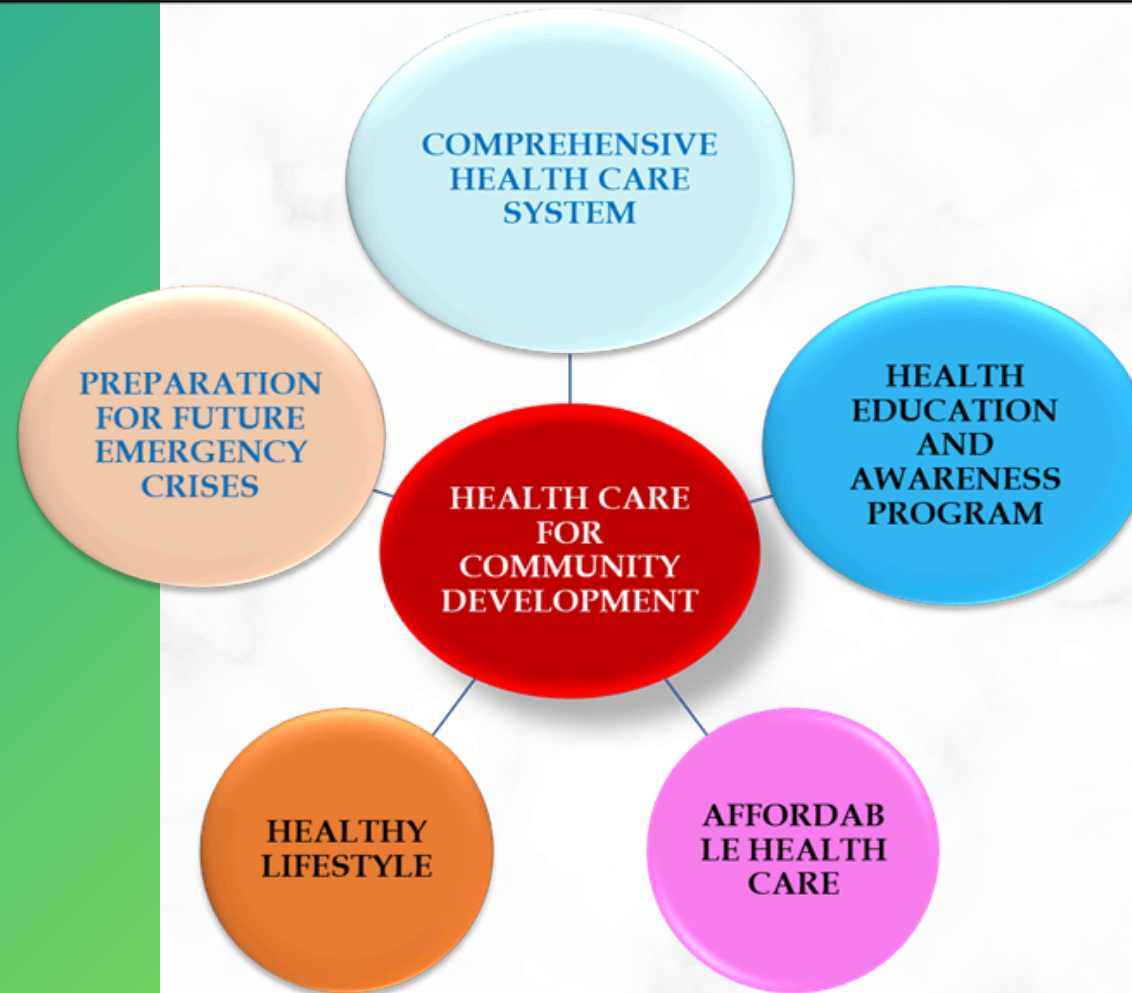

- Enhancing Health Literacy, Access and Empowerment
- Promoting Healthy Lifestyles and Behaviour Change
- Enhancing the Capacity of Communities to Withstand Challenges and Preparing for Crises

THE PRACTICE

P P Savani University goal is to cultivate a holistic approach to healthcare through the following components:

COMPREHENSIVE HEALTHCARE SYSTEM

Our university is proud to offer a unique and diverse range of medical facilities to our students and staff. We have built an Ayurvedic hospital, an Allopathic hospital, and a Homeopathic Hospital, all of which are equipped with state-of-the-art technology and staffed by highly trained medical professionals. In addition, we have an advanced operation theatre and high-end X-ray machine, allowing us to provide a comprehensive range of medical options to our community. We operate a mobile clinic to provide healthcare services to students and staff, as well as nearby communities.

Our university has established partnerships with numerous healthcare facilities to provide students with comprehensive clinical training and practical experience. We have signed Memorandums of Understanding (MOUs) with hospitals, established a satellite health center, and have tie-ups with Primary Health Centers (PHCs) and Community Health Centers (CHCs). These partnerships enable our students to gain hands-on experience in a variety of clinical settings, under the supervision of experienced healthcare professionals. For medical emergencies, we have a fleet of ambulances on standby.

PROVIDE ACCESS TO AFFORDABLE HEALTHCARE

Our institution is committed to the safety and well-being of both our employees and students. To ensure their protection in case of unforeseen events, we provide comprehensive accidental health insurance coverage to our employees as well as our students, providing them with much-needed financial security in the event of an unexpected accident or fatality.

University ensures accessibility to quality healthcare for all teaching, non-teaching staff, and even supporting staff like housekeeping, drivers, and canteen staff and community, by offering free services, the university tackles financial barriers to healthcare access. Due to the importance of preventative healthcare in the context of holistic wellness, the University's facilities offer free health checks and thalassemia testing for all students. This proactive strategy empowers students to manage their health and detect risks.

HEALTH EDUCATION AND AWARENESS PROGRAMS

Schools of Nursing, Physiotherapy, Homeopathy and Ayurveda organize weekly health camps in nearby villages to provide medical check-ups, health education, and awareness programs for the community.

To promote health awareness, the university actively celebrates numerous health days throughout the year, including World Heart Day, World Mental Health Day, World Cancer Day, World Diabetes Day etc. In addition, students from diverse disciplines such as Nursing, Physiotherapy, Homeopathy are also assigned to hospitals in accordance with regulatory organizations to guarantee ample exposure to holistic care for these students.

FACILITATE HEALTHY LIFESTYLE

University promotes healthy habits in staff and students through nutrition and fitness workshops, and provides access to recreational facilities, fitness classes, Yoga sessions, Zumba sessions, weekly sports sessions and month end celebrations.

The university boasts a cutting-edge gymnasium facility that is separated by gender. In addition, the university promotes physical activity and a healthy lifestyle by encouraging students to take the stairs instead of the elevator. The university recognizes the importance of mental well-being. A team of qualified counsellors and psychologists provides individual and group therapy sessions

HEALTHCARE INITIATIVE DURING PANDEMIC COVID-19

P P Savani University has collaborated with local government and health officials to organize periodic COVID-19 testing camps on campus. Additionally, we coordinated immunization drives for the staff, faculty, students and nearby industries persons. We distributed covid-19 preventive medicine recommended by AYUSH department and food parcels were also distributed to truck drivers, individuals and families impacted by unemployment and financial difficulties resulting from the pandemic.

When the pandemic hit, our institution made sure to protect our employees by providing COVID-19 insurance coverage to all staff. Unfortunately, a few members of our team were affected by the virus and were able to use the insurance to pay for their medical expenses, which would have otherwise been a significant financial burden. Our students and staff have devised innovative measures to combat the transmission of COVID-19. These include the development of masks coated with nano-materials, the creation of an organic sanitizer, and the invention of a contactless sanitizer dispenser machine. The university extended both emotional and financial assistance to students who lost their parents as a result of the pandemic, in the form of waived fees and scholarships.

EVIDENCE OF SUCCESS

Our commitment to healthcare excellence is reflected in our state-of-the-art facilities, including a hundred-bed Ayurvedic hospital, a twenty five-bed Allopathic hospital, and a twenty five -bed Homeopathic hospital, offering a range of effective treatment options for our patients. Traditional Panchakarma treatment is available at the Ayurvedic Hospital with all the necessary equipment. Both traditional practices and cutting-edge medical technology are utilized at the Homeopathic Hospital.

We have signed Memorandums of Understanding (MOUs) with seventeen hospitals and have tie-ups with seven Primary Health Centres (PHCs) and Community Health Centers (CHCs). Our university's Satellite Health Centre at Kosamba provides quality healthcare services to the surrounding communities, with a focus on accessible and affordable care

EVIDENCE OF SUCCESS

In the last five years, our university has conducted an impressive two hundred plus health activities for community development, demonstrating our commitment to improving health and well-being. Regular Health Day celebrations and awareness initiatives are part of our university's commitment to improving health and well-being. We host frequent Thalassemia campaigns, blood donation drives, and stem cell donation drives because we aim to educate our community about different health conditions.

The university provides a Health Insurance Reimbursement policy to promote the health and well-being of its employees, offering financial aid for medical costs. During the current year, over hundred employees have availed the benefits of this policy, resulting in the university reimbursing healthcare expenses exceeding twelve lakhs. Furthermore, we have revised our leave policy to provide increased adaptability and provisions for the overall welfare of our employees.

EVIDENCE OF SUCCESS

In line with the Fit India movement, our University Sports department works to make sure that staff members are physically healthy. We plan fun games and exercise sessions outside every week. These activities not only help our staff stay fit, but they also bring them together and urge them to live a healthy life.

Department of Public Health participated in a community mental health project in 2021 organized by UHCRCE, Surat and the department got project grant for community mental health program.

The PPSU vaccination centre has administered over two thousand doses of the Covid vaccine to individuals. The students and staff have demonstrated remarkable creativity and resourcefulness in creating Nanocoated masks, organic sanitizers and contact less sanitizer dispenser, and we are pleased to witness their diligent efforts and commitment making a beneficial contribution in the battle against COVID-19. More than two thousand bottles of organic sanitizer and nearly five thousand masks were distributed by university during pandemic.

EVIDENCE OF SUCCESS

Members of Faculty and students of the university diligently published a significant amount of data during the Covid Pandemic. Five research articles and one review paper were published in reputable journals.

The information comprised several research articles on various Covid-related topics, such as "Polymorphic landscape of SARS-CoV-2 genomes isolated from the Indian population in 2020 demonstrates rapid evolution in ORF3a, ORF8, nucleocapsid phosphorylation, and spike glycoprotein"; "In Silico Docking Studies of Antimalarial Drug Hydroxychloroquine to SARS-CoV Proteins: An Emerging Pandemic Worldwide"; Impact of COVID-19 Pandemic on Mental Health and Effects of a Sense of Verdict of Selected College Students in Nepal, Nigeria and India" etc.

The nearby local panchayats and medical personnel have acknowledged and honoured our university for its outstanding community health care services. We take great pride in the fact that we have successfully influenced and improved the lives of others in our vicinity.

AT P P SAVANI UNIVERSITY

Our university is proud to offer a unique and diverse range of medical facilities to our students and staff. We have built an Ayurvedic hospital, an Allopathic hospital, and a Homeopathic Hospital, all of which are equipped with state-of-the-art technology and staffed by highly trained medical professionals. In addition, we have an advanced operation theatre and high-end X-ray machine, allowing us to provide a comprehensive range of medical options to our community.

P P SAVANI AYURVEDIC COLLEGE & HOSPITAL

P P SAVANI AYURVEDIC HOSPITAL

Our Ayurvedic hospital is a state-of-the-art facility offering a comprehensive range of traditional and modern treatments. With a capacity of hundred beds, our hospital provides a serene and peaceful environment for patients to recover and rejuvenate. Our Panchakarma centre offers a range of detoxification and rejuvenation treatments, including Abhyanga, Shirodhara, Swedana, and more. Our expertly trained therapists will work with you to create a personalized treatment plan tailored to your specific needs. Our in-house medicine store offers a wide range of Ayurvedic medicines, herbal supplements, and natural products to support your health and wellness journey.

Our team of well-experienced doctors and therapists are dedicated to providing personalized care and treatment plans. With years of experience in Ayurvedic medicine, they will work closely with you to address your health concerns and achieve optimal wellness. We believe that Ayurvedic medicine should be accessible to all. Hence, we offer affordable and subsidized rates for our treatments, making it easier for you to prioritize your health and wellness.

**PATIENTS TREATMENT BY DOCTORS AT
SATELLITE CLINIC (KOSAMBA)**

SATELLITE CLINIC AT KOSAMBA

Our university has taken a significant step towards community healthcare development by establishing a satellite Physiotherapy and Homeopathy clinic at Kosamba in 2021. This state-of-the-art clinic provides accessible and affordable healthcare services to the local community, focusing on preventive and curative care.

The clinic offers a range of services, including physiotherapy, homeopathy, and health education, to promote overall well-being and prevent chronic diseases. By establishing this satellite clinic, we aim to bridge the healthcare gap in the region, improve healthcare outcomes, and enhance the quality of life for the local community. Through this initiative, we are committed to providing high-quality healthcare services that are patient-centred, evidence-based, and community-driven.

**INAUGURATION OF SATELLITE CLINIC AT
KOSAMBA IN 2021**

MOBILE CLINIC FOR COMMUNITY HEALTHCARE

The Mobile Clinic of our university has been actively engaged in providing community healthcare services to nearby villages. Equipped with state-of-the-art medical equipment and a team of experienced healthcare professionals, the mobile clinic has been making regular visits to rural areas, offering a range of healthcare services including vaccinations, health check-ups, and disease screenings.

By bringing healthcare services directly to the doorstep of these underserved communities, we aim to bridge the healthcare gap and promote overall well-being among the villagers. Through this initiative, we have been able to identify and address various health issues, provide necessary treatment and referrals, and empower local residents with knowledge on preventive healthcare measures. By partnering with local authorities and community leaders, we strive to create a sustainable and inclusive healthcare system that benefits the entire community.

MOUS WITH OTHER HOSPITALS

Our university has established a network of collaborative partnerships with seventeen esteemed hospitals through Memorandums of Understanding (MOUs). These MOUs facilitate research collaborations, patient referrals, student internships, and training opportunities.

The partnerships enable our researchers to work together on innovative projects, share expertise, and leverage resources. Additionally, the MOUs provide our students with hands-on training and exposure to real-world clinical settings, while also allowing our faculty to exchange knowledge and best practices with their hospital counterparts. Through these collaborations, we are able to enhance the quality of patient care, advance medical knowledge, and foster a culture of interdisciplinary collaboration and innovation.

વિષય: અમારા ગામમાં આયોજિત કોવીડ નિવારણ દવા વિતરણ માટે પ્રશંસા પત્ર		
અમારા ગામમાં તાજેતરના "કોવીડ નિવારણ દવા વિતરણ" તારીખે 14.09.2020 ના આયોજન માટે કરવામાં આવેલ ઉત્કૃષ્ટ પ્રયાસો માટે હું પી.પી. સવાણી હોસ્પિટલ અને યુનિવર્સિટીનો નિષ્ઠાપૂર્વક આભાર વ્યક્ત કરવા માટે લખી રહ્યો છું. ખરોડ ના સરપંચ તરીકે, આ પહેલની આપણા સમુદાયના આરોગ્યસંભાળ વિકાસ પર જે અસર પડી છે તેનાથી હું ખૂબ જ પ્રભાવિત છું.		
ખરોડ ના રહેવાસીઓ વતી, હું પી પી સવાણી યુનિવર્સિટીનો અમારા સમુદાયના આરોગ્યસંભાળ વિકાસમાં અમૂલ્ય યોગદાન બદલ હૃદયપૂર્વક આભાર માનું છું.		
હું અમારા ગામ અને પી.પી. સવાણી યુનિવર્સિટી વચ્ચે ભાવિ સહયોગની સંભાવનાની રાહ જોઉં છું, કારણ કે અમે તંદુરસ્ત અને વધુ સ્થિતિસ્થાપક સમુદાયના નિર્માણ માટે સાથે મળીને કામ કરવાનું ચાલુ રાખીએ છીએ.		
S. F. K. P. 21 સરપંચ ગામ પંચાયત, ખરોડ

APPRECIATION LETTER FROM SARPANCH OF VILLAGE NANDAV FOR ORGANISING A RESPIRATORY HEALTH CAMP

પ્રતિ

પી પી સવાણી હોસ્પિટલ,

પી પી સવાણી યુનિવર્સિટી,

ધામદોડ, સુરત

વિષય: અમારા ગામમાં આયોજિત કોવિડ-19 પ્રત્યે જાગૃતિ કાર્યક્રમ માટે પ્રશંસા પત્ર

અમારા ગામમાં તાજેતરના "રેસ્પિરેટરી હેલ્થ કેમ્પ" તારીખે ૨૫/૧૦/૨૦૨૨ ના આયોજન માટે કરવામાં આવેલ ઉત્કૃષ્ટ પ્રયાસો માટે હું પી.પી. સવાણી હોસ્પિટલ અને યુનિવર્સિટીનો નિષ્ઠાપૂર્વક આભાર વ્યક્ત કરવા માટે લખી રહ્યો છું. નંદાવ ના સરપંચ તરીકે, આ પહેલની આપણા સમુદાયના આરોગ્યસંભાળ વિકાસ પર જે અસર પડી છે તેનાથી હું ખૂબ જ પ્રભાવિત છું.

નંદાવ ના રહેવાસીઓ વતી, હું પી પી સવાણી યુનિવર્સિટીનો અમારા સમુદાયના આરોગ્યસંભાળ વિકાસમાં અમૂલ્ય યોગદાન બદલ હૃદયપૂર્વક આભાર માનું છું.

હું અમારા ગામ અને પી.પી. સવાણી યુનિવર્સિટી વચ્ચે ભાવિ સહયોગની સંભાવનાની રાહ જોઉં છું, કારણ કે અમે તંદુરસ્ત અને વધુ સ્થિતિસ્થાપક સમુદાયના નિર્માણ માટે સાથે મળીને કામ કરવાનું ચાલુ રાખીએ છીએ.

મહેશ એ. વામણી

PPSU ACCIDENTAL HEALTH INSURANCE

At P P Savani University, we are deeply committed to the safety and well-being of both our employees and students. Recognizing the importance of providing a secure and supportive environment, we have taken a significant step by introducing comprehensive accidental health insurance coverage for employees and students. This comprehensive coverage provides financial protection in the event of an accident, with a coverage of Rs 50,000 to help with medical expenses.

In the unfortunate event of a fatality, we provide an additional coverage of Rs 1 lakh to support the affected families. This generous coverage is a testament to our institution's commitment to the well-being and security of our entire community. Furthermore, it is heartening to note that a few staff members have already availed of the benefits, a testament to the effectiveness of this initiative.

PPSU ACCIDENTAL HEALTH INSURANCE

By providing this comprehensive coverage, we aim to alleviate the financial burden on our employees and students in the event of an accident or untimely demise, allowing them to focus on their recovery and well-being. This commitment to the safety and well-being of our employees and students is a core value that guides our institution's policies and practices, and we are proud to offer this valuable benefit to our valued employees and students.

MENTAL HEALTH WELL-BEING INITIATIVES:

Our university is committed to promoting mental health and well-being among its students, faculty, and staff. To this end, we have a team of trained psychology counsellors on campus to provide support and guidance to those in need. Additionally, our School of Public Health has been actively involved in community mental health projects.

In 2021, we participated in a project organized by the University Health Care and Research Centre for Excellence (UHCRCE) in Surat, which focused on community mental health. As a result of our involvement in this project, the school was awarded a grant of Rs 13,200/- to support our community mental health program. Through these initiatives, we aim to raise awareness about mental health, reduce stigma, and provide access to mental health services for those who need it most.

LIST OF EMPLOYEES AVAILED HEALTH INSURANCE REIMBURSEMENT

COVID-19 PANDEMIC INITIATIVES

During the COVID-19 pandemic, our university took a proactive approach to support the health and well-being of our students, faculty, and staff. We organized various initiatives to mitigate the impact of the pandemic. One of the key initiatives was the conduct of COVID-19 testing camps, where we provided free testing facilities to our students, faculty, and staff. Additionally, we organized vaccination drives to ensure that our community was protected against the virus. To promote hygiene and prevent the spread of the virus, we distributed sanitizers, masks, and other personal protective equipment (PPE) to our students, faculty, and staff. Furthermore, we distributed food packets to those in need, particularly to the vulnerable sections of society. We also distributed preventive medicine to industries and staff who were working on the frontlines during the pandemic. Moreover, we took a compassionate approach by waiving off fees for students who lost their parents during the pandemic. These initiatives were aimed at providing support to our community, promoting public health, and mitigating the impact of the pandemic on our students, faculty, and staff.

COVID-19 PANDEMIC INITIATIVES

Members of faculty and students of the University diligently published a significant amount of data during the Covid Pandemic. Five research articles and one review paper were published in reputable journals.

The information comprised several research articles on various Covid-related topics, such as "Polymorphic landscape of SARS-CoV-2 genomes isolated from the Indian population in 2020 demonstrates rapid evolution in ORF3a, ORF8, nucleocapsid phosphorylation, and spike glycoprotein"; "In Silico Docking Studies of Antimalarial Drug Hydroxychloroquine to SARS-CoV Proteins: An Emerging Pandemic Worldwide"; Impact of COVID-19 Pandemic on Mental Health and Effects of a Sense of Verdict of Selected College Students in Nepal, Nigeria and India" etc.

ABSTRACT

India, with around 15 million COVID-19 cases, recently became the second worst-hit nation by the SARS-CoV-2 pandemic. In this study, we analyzed the mutation and selection landscape of 516 unique and complete genomes of SARS-CoV-2 isolates from India in a 12-month span (from Jan to Dec 2020) to understand how the virus is evolving in this geographical region. We identified 953 genome-wide loci displaying single nucleotide polymorphism (SNP) and the Principal Component Analysis and mutation plots of the datasets indicate an increase in genetic variance with time. The 42% of the polymorphic sites display substitutions in the third nucleotide position of codons indicating that non-synonymous substitutions are more prevalent. These isolates displayed strong evidence of purifying selection in ORF1ab, spike, nucleocapsid, and membrane glycoprotein. We also find some evidence of localized positive selection in ORF1ab, spike glycoprotein, and nucleocapsid. The CDs for ORF3a, ORF8, nucleocapsid phosphoprotein, and spike glycoprotein were found to evolve at rapid rate. This study will be helpful in understanding the dynamics of rapidly evolving SARS-CoV-2.

1. Introduction

The outbreak of coronavirus disease (COVID-19) was reported from Wuhan, China on 31 December 2019 and by March 11, 2020, it was declared as a global pandemic. The COVID-19 is caused by a novel human pathogen which was initially named 2019-novel coronavirus (2019-nCoV) and later officially named Severe Acute Respiratory Syndrome Coronavirus 2 (SARS-CoV-2) by the Coronaviridae Study Group (CSG) of the International Committee on Taxonomy of Viruses (Gorbalenya et al., 2020). The complete genome of the SARS-CoV-2 was first obtained and submitted by Wang et al. (2020). Phylogenetic analysis of the submitted sequence revealed 89.1% nucleotide similarity between the SARS-CoV-2 and SARS-like coronaviruses (genus Betacoronavirus, subgenus Sarbecovirus) previously found in bats (Hu et al., 2018), indicating viral spill-over from animals to humans (Wu et al., 2020).

The genome of SARS-CoV-2 includes an orderly arrangement of 5'-untranslated region (UTR), replicase complex (ORF1ab), spike glycoprotein, ORF3a, envelope, membrane glycoprotein, ORF6, ORF7a, ORF7b, ORF8, nucleocapsid phosphoprotein, ORF10, and 3'-UTR (Jungreis et al., 2021; Wang et al., 2020). The ORF1ab refers to the two ORFs, ORF1a and ORF1b, combined via programmed -1 frameshift four codons before the end of ORF1a. ORFs 1a and 1b are broadly responsible for control of genome expression and viral replication, respectively (Jungreis et al., 2021). The SARS-CoV-2 is an enveloped virus, which belongs to the family of coronaviruses and carries ~30 kb positive-sense single-stranded RNA as its genetic material (Laamarti et al., 2020). SARS-CoV-2 has been estimated to origin somewhere between Oct and Dec 2019 (van Dorp et al., 2020) and has been reported to evolve relatively slowly (Singh and Yi, 2021). However, it has witnessed explosive population growth by circulation in millions of humans since its outbreak in Dec 2019. Therefore, the dynamics of its mutation and selection is an exceptionally active area of ongoing research.

According to the World Health Organization (WHO), COVID-19 has infected nearly 148 million individuals globally and claimed 3.12 million lives until April 27, 2021. The exponential spread of the SARS-CoV-2 virus across the globe has steered substantial interest in its

In silico docking study showed that hydroxychloroquine drug interactions with SARS-CoV2 show a higher binding affinity with spike glycoprotein and PLPRO protein compared to protein envelopes that could be ladder for potential targeting and synthesizing of another antiviral drug. In silico methods used in this study, the efficacy of a wide variety of repositioned and/or novel drug candidates could also be tested prior to clinical evaluation.

ABSTRACT

Nations around the world are presently fighting the coronavirus disease 2019 (COVID-19) pandemic, which is caused by severe acute respiratory syndrome coronavirus 2 (SARS-CoV-2). Currently, COVID-19 does not have a recognized antiviral treatment. Various clinical hearings have been originated to recognize a working treatment. One important contender is remdesivir (GS-5734), a broad-spectrum antiviral that was firstly industrialized for the treatment of Ebola virus (EBOV). A variety of studies have been conducted since the outbreak of Coronavirus disease 2019 (Covid-19) in order to describe and find the best way to combat Coronavirus disease 2 (SARS-CoV-2). The antiviral drug, remdesivir (GS-5734), previously tested against the Ebola virus was moderately effective and probably safe in inhibiting the replication of the SARS-CoV-2 virus after numerous suggestions and assessments. During the week of 1 May 2020, the Food and Drug Administration approved remdesivir (GS-5734) as an investigational drug for the treatment of Covid-19.

INTRODUCTION

In 2016, when it was first developed to battle the Ebola virus disease (EVD) outbreak in Africa, the story of remdesivir started with the enlargement code name of GS-5734 (Warren TK, 2016). The nucleoside analog (NA) remdesivir inhibits the RNA-dependent RNA polymerase (RdRp). The active form of remdesivir (GS-441524), inhibits viral RNA polymerase, restricting viral duplication, after metabolism into its active form (Agostini Maria L, 2018). Coronaviruses (CoV) are participants of the family Coronaviridae in the order Nidovirales, and contain a huge number of enclosed, positive-sense single-stranded RNA viruses causing a variety of infections in animals and humans (J. Cui, 2019).

The 21st century has previously seen an important number of outbreaks: severe acute respiratory syndrome coronavirus (SARS-CoV) in 2002, the Middle East respiratory syndrome

organ dysfunction and, ultimately, decease (W.J. Wiersinga, 2020).

Specified the element of the COVID-19 pandemic, in the previous months significant energies have been absorbed in the direction of the repurposing of FDA-approved medicines to eradicate wide security testing essential for novel drugs. Up to now, single one clinically accessible antiviral remedy has been permitted by US health specialists for COVID-19: remdesivir (Bhimraj A, 2020).

Ebola Virus and Remdesivir

Viruses in the Ebola family are classified as Filoviridae, a taxonomic group of enclosed, non-segmented, negative-strand RNA viruses. People infected with EBOV firstly have non-specific signs, such as sickness, vomiting, and diarrhea, with the hemorrhagic stage happening in half of the cases (H., 2011).

Abstract

Background: The COVID-19 pandemic has brought a negative impact on mental health among college students across the world. Mental health issues are the leading obstacle to academic success. Aim of the study was to assess the prevalence and impact of COVID-19 on mental health and effects of a sense of verdict of selected college students from Nepal, Nigeria and India.

Methods: Non-probability, snowball sampling technique was applied for data collection. A total of 696 responses were recorded from selected colleges from Nepal, Nigeria and India. Online survey-based platform was used to distribute the e-questionnaire to collect the information. Online survey was conducted from 15th to 30th June 2020.

Results: More than half of the respondents 390(56%) had experienced depression during lockdown period. Majority of respondents 45(75.0%) from Nigeria had undergone depression followed by Nepal 73(58.87%) and India 271(52.93%). Young respondents 194(38.6%) in the age group of 18-20 years had experienced mild depression.

Conclusion: The lockdown due to COVID-19 pandemic has been brought an extraordinary academic challenge to the students across the world. It is necessary to adapt holistic approach to develop interventions and preventive strategies to address the mental health of college students for their well being.

Key words: COVID-19, mental health, depression, college students and lockdown
