## Masters in Public Health (MPH)

Public health initiatives affect people every day in every part of the world. It addresses broad issues that can affect the health and well-being of individuals, families, communities, populations, and societies—both now, and for generations to come and hence the work of public health professionals becomes more important. Development of public health workforce is the necessary prerequisite for finding solutions to enormous public health problems and challenges in India. Keeping this scenario in mind, P P Savani University has decided to start the Masters in Public Health program from last academic year.

MPH offers interdisciplinary strategies that helps in addressing healthcare needs of the community through research and community services.

The MPH program emphasizes active, student-directed learning that requires students to acquire skills in problem solving related to public health issues. These skills are imparted through various pedagogical techniques required including classroom teaching, field visits, internship and dissertation in renowned government and non-govt organizations.

The curriculum is organized around core disciplines of public health, Epidemiology, Biostatistics, Health Prevention and Promotion, Social and Behavioral aspects of Health, Health Management, Health Research and Management of Public Health Programs.

We have more than 50% International Students in our last batch.

**Duration:** 2 years
