- (vi) How to declare 2-D matrix in JavaScript?
- (vii) What are the features of JavaScript?

Q - 2 (a) What is Array? Describe any three array function with suitable example. [05]

Q - 2 (b) Print the pattern. [05]

```
1
2 3
4 5 6
7 8 9 10
```

OR

Q - 2 (a) Write a program to sort array element in descending order. Take input from user. [05]

Q - 2 (b) Explain While and do-while loop in JavaScript with suitable example. [05]

Q - 3 (a) Explain following method with suitable example. [05]

- i. subString()
- ii. replace()
- iii. split()

Q - 3 (b) List five Math object method. Explain any two method with suitable example. [05]

OR

- Q - 3 (a) List five Date object method. Explain any one method with suitable example. [05]
- Q - 3 (b) Explain following method with suitable example. [05]
- i. charAt()
 - ii. indexOf()
 - iii. slice()

- Q - 4 How to send, receive and store data in JSON? [05]

SECTION - II

- Q - 1 Answer the following. (Any Five) [05]
- (i) How Node.js modules are available externally?
 - (ii) Node process is Local Object. TRUE / FALSE
 - (iii) Which function is used to include modules in Node Js.
 - (iv) Define DOM.
 - (v) List out the different ways an HTML element can be accessed in a JavaScript code.
